HEAVY DUTY TIRE SEALANT

PREVENTS FLAT TIRES

SEALS PUNCTURES

KEEPS YOU READY AND RUNNING REGARDLESS OF YOUR INDUSTRY:

- Agriculture
- Lawn Care/Landscape
- UTV/ATV
- Work Trucks
- Mining
- Military
- Over-the-Road

HOW IT WORKS:

At rest iSealTires forms a small pool of product at the bottom of the tire. As the tire/wheel assembly rotates, product evenly distributes throughout the assembly coating all inner surfaces; virtually eliminating air loss from small insidious leaks. When the vehicle slows down and comes to a stop, iSealTires reforms a pool; again protecting the tire from punctures, as well as, slow leaks. When punctures occur, air pressure forces fillers and fibers into the injury. Rolling under load mechanically compacts iSealTires in the injury into a flexible air tight plug. This is how iSealTires virtually eliminates air loss.

SPECIFICATIONS

An Environmentally Friendly Liquid Containing:

- Glycol
- Corrosion inhibitors
- Fillers
- Synthetic Fibers

Operating Temperatures:

- -30 F (-34 C)
- >285 F (>140 C)

- Soluble in water (easily water washable)
- Compatible with all natural and synthetic rubbers
- Compatible with all tire repair materials, just wash out, dry and repair
- Provides approximately 1/4" puncture sealing when used in ballasted tires. (1 Part iSealTires to 15 Parts water/anti-freeze)
- Provides 1/4" Barcast STMT
